PROFESSIONAL EXPERIENCE

POKER HUT - REACT TYPESCRIPT PROJECT

11/2023 – Present

Description: Contributing as a Frontend/UI Developer on the "PorkerHut" project, an Agro-Commerce E-Commerce platform aimed at connecting farmers and producers with potential customers. Focused on mastering React.js and TypeScript skills to craft specific user interface components, ensuring a creative and responsive experience for both sellers and buyers in the agricultural sector.

Key Contributions:

- Developed and implemented specific user interface components using React.js and TypeScript, resulting in a 30% reduction in user onboarding time and a 20% increase in user engagement metrics.
- Streamlined UI component integration within the application structure through close collaboration with the development team; resulting in a 30% decrease in UI-related bugs and enhanced overall user experience, leading to a 15% increase in user retention
- Participated in daily stand-up meetings to discuss project progress, share insights, and coordinate tasks with team members.
- Efficiently manage tasks and assignments using ClickUp, ensuring streamlined communication and collaboration within the development team.

Technologies Used: React.js, TypeScript, HTML5/CSS3, Tailwind CSS

MORERO - CONSTRUCTION PROJECT MANAGEMENT SOFTWARE

10/2023 – 12/2023

Description: Initiating frontend/UI development for Morero, a streamlined construction project management software designed to enhance team efficiency, productivity, and work-life balance. This web application, built with CodeIgniter PHP and Bootstrap, features a centralized data environment and integrated project planner to streamline construction management processes—reducing errors and saving valuable time.

Key Contributions:

- Implement the front-end development efforts, focusing on UI enhancements, responsive design, and flexible layouts to optimize user experience.
- Implemented improvements resulting in a 20% reduction in user-reported issues and enhanced overall usability, contributing to improved team efficiency.
- Designed and developed a captivating landing page for Morero, resulting in a 25% increase in sign-ups and initial user engagement.
- Ensured seamless user experience across devices by implementing responsive design principles, leading to a 30% increase in mobile user engagement.

Technologies Used: CodeIgniter PHP, Bootstrap
